Hopefully see you all out and about at the club at some stage soon.

Gentlemen,

Well, here's hoping that everyone had a stress-free journey home on Sunday, with minimal pit stops. That was a scorcher of a weekend, probably not ideal but we managed to negotiate it one way or another. I trust everyone had a great time away, I thoroughly enjoyed the whole weekend and thank everyone for making it such a special occasion, one that I will never forget, absolutely fabulous. Couldn't fault how accommodating all the golf clubs along with the hotel were, and they more than exceeded my expectations.

I also wanted to thank you all for participating in, and in good faith accepting the fines that were implemented in aid of the chosen charity, along with the fun aspect of the slippery snakes. In total we managed to contribute £152 for a very good cause, to which I'm extremely grateful for your support.

Hopefully most of you got to meet and play against someone new who you didn't previously know, the intentions were to try and mix everyone up, which I thought worked well throughout the trip, going forward most of us can now put a face to a name.

Congratulations to all the winners, and commiserations to those that weren't so lucky, there's always next time.

Best wishes and regards, Captain Dean.

Lady Captains Away break

Lady Captain Ann and 27 additional ladies enjoyed a lovely 2-day golfing break at Breadsall Priory. The weather was kind on day 1 with glorious sunshine, but not so kind on day 2, torrential downpour. The ladies battled on in true spirit until the klaxon alert and the course closed! Lots of great golf, laughter and fabulous company. Many thanks to all who attended and made it such an enjoyable event.

Robotics

IMPORTANT Robots must not be turned off by golfers under any circumstances, just wait for a robot to pass and then continue to play. Any future instances of members stopping a robot mower will be regarded as a serious breach of the clubs code of conduct as if a robot is down for a prolonged period there is a danger that the mapping will be lost resulting in much work to restore it to normal operation.
